4. **Discussed items:**

We have determined the shape of the base of our solar vehicle. We changed our mind about the shape. Now, we opt for a T- shape. We still want to give the car three wheels. We did some extra measurements for case 1 SSV.

After this week, we want to have most of the calculations done.

This calculations will be done with the help of MatLab and Simulink.

Date next meeting: 12/03
